I don't know	2 (9,5%)
Total	21 (100,0%)

Did you learn what you expected?

Yes

yes

Yes

Yes

It was too difficult to follow through, so I gave up!

Yes, the study materials and assignments helped a lot to learn step by step in a very systematic way.

yes

Yes, I got a good basic knowledge of c++ programming.

Skulle titta på en annan bok då denna verkar vara svår att få tag på. Hade varit skönt att ha en bok att läsa ur med.

jo då lite rutin på studera . man blir väl bättre

Learning situation:

The teacher/tutor(s) took part in creating an active and engaging learning situation.

Give feedback and also suggestions for improvements.

Make the course slower, it's too difficult to produce four assignments to six assignments every step and harder steps should go on for more than two weeks...

Jag skulle önska att varje steg inleddes med en lärarledd introduktion/föreläsning (kanske med livekodning), där man samtidigt har chans att ställa frågor direkt till läraren.

om man bommar skulle man kunna få länkat det man inte kunde för mig är videos lättast

How do you value the different course elements?

Lectures

Lectures	Number of Responses

Did not participate/Not applicable	3 (13,6%)
Total	22 (100,0%)

Give feedback and also suggestions for improvements.

I could not participate in lectures due to schedule problems (they overlapped with another course where attendance was mandatory), but the quality of tutorials, supplementary materials, and teacher's feedback was good to such extent that I was still able to perform well in practical tasks and theoretical tests.

Kursens handledning har varit jättebra, med möjlighet till både chatt och telefonsamtal med läraren två gånger i veckan. Däremot kan jag tycka att en gång i veckan hade räckt. Som jag redan påpekat hade jag hellre sett att ett av dessa handledningstillfällen ersattes av en introducerande steg-föreläsning. Det är väldigt mycket att läsa in på egen hand i denna kurs och det kan bli tungt helt utan föreläsningar.

The laboratory lessons has been of high quality but way to hard for someone who hasn't been studying programming before.

Great lab assignments with a big variety of tasks. The mandatory tasks were very good, and supported the basic concepts of the different chapters.

Bästa handledningen och kommentarer på inlämningar jag någonsin haft.

det ska väl vara mer video pause/stop se igen

Is there something else you would like to describe? Did you have any extra positive experiences from the course? In what way can the course be improved? Tell freely! What do you think?

Is there something else you would like to describe? Did you have any extra positive experiences from the course? In what way can the course be improved? Tell freely! What do you think?

I have taken 9 other courses, and none of them we're nearly as structured and easy to follow as this one. The organization of the study materials is incredible, everything that the teacher refers to is easily accessible, from what software to use and how to set it up, to the book, practical examples, and extra reading. Communication with teaching staff was outstanding, especially considering that the course is a distant one. The practical assignments have been checked very quickly and any email/forum question was answered within 1-2 days which is simply unheard of.

The feedback on the practical assignments have been impressive as well - I could always tell that the teacher took a good amount of time to look through my code and comments, teacher's comments have been very explanatory and easy to follow, which made them very useful regardless of whether the task was approved or not.

Stegtesterna på internet är i och för sig ett trevligt sätt att slippa en tenta i Kalmar men de är under ALL kritik. Programmet är utvecklat i designidén för windows 3.1, frågorna är luddiga och otydliga och ibland så håller inte min kompilator med om svaren samt att man inte får någon aning om vad man har missförstått. Detta det negativa, det positiva är Anne Norling, där återkopplingen på stegtesterna är obefintlig är återkopplingen på de inlämnade uppgifterna fantastisk, på ett glatt och trevligt sätt gås alla uppgifter igenom med både positiva och mindre positiva delar och där all negativ återkoppling är väldigt konstruktiv och förslag på optimering för framtiden ges tydligt!

Anne was really committed to giving detailed valuable feedback on all submissions. Her regular posts about the course was also good reminders. The extra material matched the course and tests well.

It would have been nice with more interaction between the students, but that is always hard with courses done on distance. Maybe some more requirements /motivations could be possible.

I really enjoyed this course, thank you!

The course platform got loaded with a lot of very useful documents during the years, but this does not make it very easy to have a quick overview. Sometimes I wouldn't find a document right away, because I was just overwhelmed by the information. Some more modern learning environments are better to show you the right information at the right moment.

It would also be nice if some of the Swedish video lectures would be translated or recorded in English and sometimes I noticed some Swedish words in some assignments; which led me to choose different laboratory tasks in those cases.

Nonetheless I found the course really interesting, and the teacher always gave very extensive feedback!

I just want to thank Anne (Course Instructor) for her active and continuous support throughout the course.

She was so organized and always active when it comes to any problem. Her constructive feedbacks regarding the assignment helped a lot .

I am so grateful for having her as our instructor.

Extra positivt med kursen har varit läraren Annes engagemang. Hon har alltid varit lätt att få tag på, både via chatt, mail och telefon. Hennes återkoppling på laborationer har varit informativ, noggrann och välgrundad. När jag som elev lägger ner mycket tid på mina laborationer uppskattas det verkligen att få en grundlig återkoppling från läraren. Anne har varit en klippa!

Det jag har att anmärka på är kursens omfattning/upplägg. Jag anser att följande moment är för många och för tidskrävande för en 7,5-poängskurs:

* 6 delprov

* 1 slutprov

* Ett 20-30-tal laborationer (beroende på vilken svårighetsgrad man väljer)

Jag har läst kursen i studietakten 50%, men har ändå fått lägga ca 30-40 studietimmar i veckan för att hinna med allt. Jag tror att ett minskat antal laborationer (kanske en stor laboration per steg), samt live-föreläsningar skulle bidra till ett mer gediget lärande. Risken med att "stessa sig igenom" en kurs med så många moment är att kunskaperna inte hinner befästa.

I think that the course overall is of high quality, but I strongly question the amount of examinations. For a course of 7,5 hp 14 examinations in all seems ridiculously much. I've been putting in much more time than you're supposed to. For someone with prior programming experience it seems as a very good choice, but for others with no prior experience I would not recommend this course.

However, I would like to all creeds to the structure of the course. The information and the formation of the course is of great quality. Also the teacher gives you a lot of feedback and is highly present despite that the course is given on distance, which I appreciated very much.

Great assignments!

Det hade varit roligt med en del uppgifter som innefattade grafiska moment också.

In general very good course! I have only one comment: The information on coursepress might need some restructuring. At the beginning of the course it was a bit confusing and difficult to know what needs to be done, etc since the information were spread out on many places and documents.

As it says in the syllabus it's a introduction course to programming. I had som programming experience before the course, so I took the class for learning c++ syntax. Which also meant that I though the course was quite easy. But I think it's a really good course for beginners

skönt att slippa grundskolan
